

Learn Management Concepts & Proven Technical Skills to Ensure You Achieve Specified Design, Engineering & Construction Solutions for Your Building Projects

Effectively Manage Your Building Construction Projects Through Advanced Skills

Proven Industry Best Practices in Building Construction Management

The **Advanced Diploma of Building & Construction (Management)** brings together new management concepts and proven technical skills to ensure that a building project meets all the criteria for time, cost and quality for a successful project outcome. Participants for this program will be able to develop skill sets to effectively supervise and administer the many activities of a large commercial building development, ensuring all key activities and deliverables are successfully co-ordinated and managed throughout each stage of the project.
